PROFILE SUMMARY

Program Director and Delivery Lead with 20+ years of experience driving large-scale business transformation, portfolio management, and AI-led process improvement across global consulting and industry environments. At EY, led transformation programs across 6 countries, managing 450+ professionals and multi-million-dollar portfolios. Expert in building PMOs and CoEs from scratch, engaging CXO-level stakeholders, and delivering measurable outcomes through governance frameworks, change management, and end-to-end program delivery. **PMP | PRINCE2 | MSP | CPMIAI certified. Experienced in delivering within structured compliance, audit and quality frameworks including CMMI and ITIL.**

CORE COMPETENCIES

Program & Portfolio Management | BPO Governance & Partner Management | GBS / GCC Operations | Business Transformation | AI-led Transformation | Change Management | PMO Setup & Leadership | Delivery Management | Governance Frameworks | Stakeholder & CXO Engagement | P&L Management | Vendor & Contract Management | H2R | S2P | Analytics & BP&A | Agile & SDLC | Resource Management | Risk & Compliance Management | BCDR Planning | Lean Six Sigma

KEY ACHIEVEMENTS

- Led **CMMI Level 3→5 transition** at EY Consulting using a structured 18-month change program, resulting in **25% efficiency improvement** and standardized delivery across the practice.
- Automated manual reporting using AI tools, reducing **errors by 80%** and **effort by 60%**, resulting in significant cost savings and full stakeholder adoption.
- Digitized 5 internal EY applications using AI tools (Replit, Factory.AI), resulting in **\$250,000 cumulative cost benefit**.
- Built site operations from scratch at Lenovo, taking over from IBM using a **GCC setup model**, resulting in a fully operational delivery centre managing **450+ professionals**.
- Recovered **\$200,000 USD** from billing errors at Lenovo through structured vendor and internal expense audit methodology.
- Executed end-to-end Golden Peacock Award submissions at Lenovo, resulting in **Lenovo winning the award twice** — recognising national-level operational excellence.

WORK EXPERIENCE

Ernst & Young (EY) | Associate Director – Program Lead

Sept 2016 – Present | Bengaluru

- Led CMMI Level 3→5 transition using a structured 18-month change program, resulting in 25% efficiency improvement and standardized delivery across EY Consulting.
- Delivered ~75 product releases per quarter across 20 products using Agile frameworks and SDLC best practices, resulting in on-time, within-budget delivery through effective resource management.
- Digitized 5 internal applications (PDMI, capacity, resource, contract, investment tools) using AI tools, resulting in \$250,000 cumulative cost benefit.
- Automated manual reporting using AI, reducing errors by 80% and effort by 60%, resulting in measurable cost savings and full stakeholder adoption.
- Transitioned Consulting QA to a supplier model using clear SLAs and change management, resulting in 10% quarterly cost reduction and improved OKR alignment.
- Built PMO and Program Management CoEs using governance frameworks and delivery excellence standards, resulting in consistent portfolio management across 450+ professionals in 6 countries.
- Launched Consulting Marketplace and SKU-based Commercial Hub using a revenue strategy framework, resulting in 20% boost to functional revenue.
- Led AI-led transformation driving adoption of Microsoft 365 Copilot and AI tools using phased rollout, resulting in 20-25% Y-o-Y efficiency gains across the function.
- Owned annual forecasting, budgeting and business case planning for the EY Consulting Service Line using data-driven BP&A frameworks, resulting in aligned investment decisions and performance visibility across the portfolio.
- Managed vendor SOWs and contracts using structured commercial governance including PO review, vendor benchmarking and escalation management, resulting in clear accountability and controlled delivery costs.

- Governed regulatory compliance and data privacy across all product releases using mandatory Privacy Impact Assessments (PIA) and InfoSec vulnerability reviews, resulting in region-specific PII compliance and secure, audit-ready delivery across a multi-country portfolio.
- Owned DR planning for product delivery programs using structured recovery frameworks, resulting in defined RTOs and operational continuity safeguards across a multi-product, multi-country portfolio.
- Designed quarterly PM capability training for 20-50 PMs using needs-based curriculum, resulting in a shift from transactional execution to outcome and value-driven delivery.
- Supported client RFP responses with engagement teams providing technology delivery inputs, resulting in well-scoped proposals and credible commitments.
- Redefined annual performance evaluation using process reengineering, resulting in improved manager feedback quality and higher adoption across the function.

Lenovo India | Business Operations Manager

Apr 2012 – Sept 2016 | Bengaluru

- Took over from IBM and built site operations from scratch using a GCC setup model, resulting in a fully operational delivery centre managing 450+ professionals.
- Owned full P&L management using GCC expense and revenue models, resulting in strong commercial acumen across budgeting, vendor management and cost optimisation.
- Managed end-to-end BPO contract lifecycle during IBM transition using cross-functional coordination across Legal, Procurement and Operations, resulting in structured vendor onboarding, SLA-governed steady state delivery and successful handover of 450+ member operations.
- Embedded Business Continuity, Disaster Recovery and data privacy obligations into BPO contract negotiations and conducted regular DR drills outside business hours, resulting in tested resilience protocols, compliant data handling and uninterrupted service delivery across the 450+ member delivery centre.
- Led end-to-end workforce lifecycle management during GCC setup including recruitment, onboarding, training and offboarding for 450+ professionals, resulting in a fully staffed, operationally ready delivery centre within planned timelines.
- Led Business Operations across MIS, WFM, Quality and Operations using structured governance frameworks, resulting in cohesive multi-function delivery across a 450+ member team.
- Drove operational analytics across the delivery centre using metrics ownership, outlier analysis, root cause analysis and corrective action frameworks, resulting in sustained performance improvement and data-driven decision making across MIS, WFM and Quality functions.
- Built and overhauled multiple MIS reporting systems using data-driven design, resulting in improved accuracy, reduced manual effort and better leadership visibility.
- Optimised workforce scheduling using WFM demand-supply modelling, resulting in 10-20% reduction in idle time and improved scheduling efficiency.
- Improved CSAT and error metrics using structured quality frameworks and root cause analysis, resulting in 20%+ improvement in quality scores.
- Delivered IT infrastructure and service quality transformation projects using ITIL frameworks and end-to-end project governance, resulting in improved service reliability and operational performance.
- Designed an on-hold monetization program using IVR-based targeted messaging, resulting in customer wait time converted into a revenue-generating upsell channel.
- Validated vendor and internal expenses using structured audit methodology, resulting in \$200,000 USD recovered from billing errors and cost leakages.
- Executed end-to-end Golden Peacock Award submissions, resulting in Lenovo winning the award twice — recognising national-level operational excellence.
- Implemented KPI dashboards using data-driven performance monitoring, resulting in faster course correction and sustained productivity gains.
- Built cross-functional RACI frameworks and governance cadences, resulting in reduced delivery conflicts across MIS, WFM and Quality functions.

Tata Technologies | Business Analyst*Feb 2011 – Mar 2012 | Mumbai*

- Supported IT and software client engagements using requirements gathering and process mapping, resulting in well-defined solution briefs and smoother project initiation.
- Improved delivery coordination across client and internal teams using structured stakeholder management, resulting in reduced ambiguity and faster sign-offs on key requirements.
- Mapped and documented existing business processes using process improvement frameworks, resulting in clearly identified gaps and actionable recommendations for client operations.

Minacs | Business Analyst*Nov 2005 – Feb 2011 | Bengaluru*

- Delivered business analysis across client programs over 5+ years, building foundational expertise in stakeholder management, process documentation, and delivery support.
